**Mountainbike**

# Technical specifications

Type:	electric bike – MOUNTAIN mid-engine
Frame size:	27,5"
Frame height:	45 cm
Motor:	mid-engine Bafang MAX 36V 250W 80Nm
Battery pack:	high performance battery (2,5 kg) <b>lithium-Ion 36V 17,4 Ah (626 Wh)</b> * without memory effect
Total weight:	25 kg
Colour:	white
Frame:	aluminum frame
Brakes:	<b>hydraulic disc brakes front and back</b>
Circuit:	8-speed Shimano Altus
Suspension:	high quality Suntour NEX suspension fork
Lighting:	bicycle lighting according to StVZO
Tires:	K1052 27.5"*2.20 Kenda
Standard equipment:	36 V charger, luggage rack, Bafang LCD PAS display
Range:	up to 120 km
max. speed:	up to 25 km / h (motor-assisted)
Specialty:	starting aid, handlebars ergonomically shaped
legal regulations:	no helmet requirement no insurance and no license plate
Optional accessories:	bicycle basket puncture protection

\* The battery of the electric bike was equipped with the most modern battery technology Li (lithium-ion battery). That means: even more power, no memory effect and can be charged in any state of charge. Furthermore, Li batteries are less sensitive to cold and heat than the commonly used batteries.
